

# Salesforce Infrastructure and Sub-processors

Published: May 22, 2026

## Scope

This documentation describes the infrastructure environment, sub-processors and certain other entities material to the services and managed packages listed in the Infrastructure and Sub-processors Table below (collectively, for the purposes of this document only, the “**Covered Services**”). Services or features not yet generally available may be included within the list of Covered Services for the purpose of providing Customers advance notice of new sub-processors or processing locations. Any reference to future services or features does not obligate Salesforce to make those services or features available. Capitalized terms used in this documentation are defined in Salesforce’s [MSA](#) and/or [Data Processing Addendum](#).

Some Covered Services are hosted on Salesforce’s own first-party infrastructure. Many of the Covered Services are fully or partly hosted on third-party infrastructures (e.g., Hyperforce), which operate as Salesforce’s sub-processors. For more information about Hyperforce, [see below](#). Many of the Covered Services run across multiple infrastructures as identified in the Infrastructure and Sub-processors Table below. Our Services are interconnected in order to provide more features to Customers within a single service. This can happen in a few different ways. For instance:

- Some Services run primarily on one infrastructure, but have some features that run partly or entirely on different infrastructures. For example, for many Customers, most Sales Cloud features run on the Salesforce’s first-party infrastructure, but Sales Cloud also includes Einstein<sup>1</sup> Features that run on the Einstein Platform infrastructure. Similarly, the Marketing Cloud Engagement Services are based primarily on the Marketing Cloud Engagement infrastructure, but some features of Marketing Cloud run partially on Einstein Platform or Marketing Cloud Einstein infrastructure. If these features are enabled, Customer Data will be processed by these additional infrastructures.
- Some Services may inherently copy data from one infrastructure onto another infrastructure for processing to function. For example, this happens when Sales Cloud Customer Data is copied into the Sales Cloud Einstein-specific infrastructure, for artificial intelligence analytics, before the scores and predictions are written back into the original Sales Cloud infrastructure. Another example is Intelligence Reports for Engagement may pull a copy of Customer Data from Marketing Cloud Engagement onto its own infrastructure to provide reporting functionality.

If a Covered Service includes features which run across multiple infrastructures using different sub-processors or hosted in different locations, the Infrastructure and Sub-processors Table will list each infrastructure involved in running the Service as a separate “purpose of processing” row detailing how, and for what features, each infrastructure is used.

---

<sup>1</sup> Rights of ALBERT EINSTEIN are used with permission of The Hebrew University of Jerusalem. Represented exclusively by Greenlight.

## Sub-processor Notifications

Salesforce Customers may subscribe to notifications of new sub-processors for those Covered Services for which Customer has a then-current active subscription by filling out this [form](#).

## Sub-processors Storing Customer Data

Many Services offer multiple alternative locations to process and/or store Customer Data. Except as set forth in the “Additional Details” column in the Infrastructure and Sub-processors Table, each cell listing countries in the table below represents an available “region” in which Salesforce processes and/or stores data for a given purpose. For example, for the Salesforce Services, data from our Germany data center is backed up into France, and so France and Germany are listed in the same cell to indicate that the “region” includes both countries. If France and Germany are in separate cells for a given purpose of processing, your Customer Data would only be stored in one of the two countries.

When a Service offers alternative locations to process/and or store data, the Customer may be able to choose their region during the setup process or by working with an Account Executive.<sup>2</sup> You may also request to have your Customer Data for a Covered Service or feature hosted in a different region, which may be accommodated, subject to availability. Further, if your Customer Data is hosted in a different region for one Covered Service, this may also affect where your data is hosted in other related services (e.g., hosting data in Europe for Service Cloud will cause your Service Cloud Einstein data to be hosted in Europe). If you have any questions about where your data is stored that this Documentation does not answer, please contact Customer Support.

In addition to the locations identified in the below Infrastructure and Sub-processors tables, Salesforce may store across its processing locations identifying information about Customers’ instance(s) and identifying information about Users for the purpose of operating the Services, such as facilitating the login process and the provision of customer support. For the Government Cloud Plus and Government Cloud Plus - Defense Services, this information (except for business address) will be encrypted with a one-way hash algorithm before it leaves the Government Cloud Plus and Government Cloud Plus - Defense-specific data centers, rendering it unreadable to Salesforce and its cloud providers.

## Customer Support

Salesforce uses its online services to provide customer support, including generative artificial intelligence. Sub-processors for the online services are listed below.

---

<sup>2</sup> Sandbox copies are created at a data center level; any instance can refresh to any sandbox within a data center. Sandbox copies in a data center may be redirected to another data center in the same region, if necessary, to maintain performance levels. As an example, an EMEA-based sandbox instance could redirect to another EMEA data center. Temporary developer testing environments branded as “Scratch Orgs” may be provisioned in a different Salesforce-operated data center from a Customer’s instance of the Covered Services, but within the same region as such instance. Scratch Orgs created by public cloud Customers reside within the Public Cloud Infrastructure.

## **Content Delivery Networks (“CDNs”)**

CDNs are utilized to optimize content delivery for certain Covered Services as listed in the Infrastructure and Sub-processors Table. CDNs are commonly used systems of distributed services that expedite the transmission of content. Note that if a CDN is described as “Global” in the Table, it may process data in any country, regardless of the Customer’s location, to better support end-users of the applicable Covered Services.

## **Related Services**

Salesforce offers highly customizable software used by Salesforce Customers across a variety of industries and businesses. Salesforce sells functionality to Customers in many packages, which we call SKUs.

Sometimes these SKUs only include functionality from one or more Services. But often, these SKUs can bundle functionality from one or more Services, along with additional, industry-specific functionality to customize the Service to an industry or business need.

One particular example of this is the “Salesforce Services”: Chatter, Experience Cloud (formerly Community Cloud), Database.com, Lightning Platform (including Force.com), Sales Cloud, Service Cloud, and Site.com). Because the Salesforce Services functionality is bundled in so many different ways in different SKUs, the Infrastructure and Sub-processors Table cannot tell you whether or not the SKU you purchase contains a particular feature within the Salesforce Services. Instead, the table lists all features that appear in any packaging of the Salesforce Services. If you have a question about whether the SKU you purchase contains a particular feature, consult the Help and Training Documentation or your Account Executive.

## **Hyperforce**

Hyperforce is Salesforce’s next-generation infrastructure foundation for deploying application stacks on commercial cloud providers. An up-to-date list of available regions for Hyperforce can be found [here](#). Not all Covered Services hosted on Hyperforce are available in every location. Please see the charts below for available locations for individual Covered Services. Due to the ongoing situation in the Middle East, new trial org sign ups and Scratch Orgs from Lebanon, Bahrain, Oman, Jordan, Qatar, Kuwait, Egypt, or the UAE will be routed to a location in the European Union. In addition, Customer Data of commercial Customer orgs in Israel will be temporarily backed up to a location in the EU until the crisis has resolved.

## Support For All Services

Note that for support of the Covered Services designated as “Services on the Hyperforce Operating Zone infrastructure” or “HF OZ”, in limited circumstances, Customer Data may be stored and/or processed outside of the available region selected by Customer and as described in the “Services on the Hyperforce Operating Zone Infrastructure” section of the [Hyperforce SPARC](#).

Purpose of Processing	Sub-processors	Locations	Additional Details
Support services, including technical operations support	Salesforce, Inc. Salesforce Argentine S.R.I. SFDC Australia Pty. Ltd. SFDC Austria GmbH Salesforce Tecnologia, Ltda. salesforce.com Canada Corporation salesforce.com France, S.A.S. salesforce.com Germany GmbH salesforce.com India Private Limited SFDC Ireland Limited salesforce.com Israel Ltd. Service provider of customer support tools	WithSecure Inc. (hosted by Amazon Web Services, Inc.)	Ireland United States	Used for scanning documents attached to cases submitted by the Customers Users for malicious content.
Service provider of customer support tools	Projector.is, Inc. (hosted by Amazon Web Services, Inc.)	United States	Used by Customer Support for screen sharing and co-browsing to help resolve customer issues.
Service provider of customer support tools	Google LLC	Global	Used by Customer Support for screen sharing and co-browsing to help resolve customer issues.

## Agentforce IT Service

Agentforce IT Service runs partially on the Lightning Platform and Service Cloud infrastructures - see infrastructure details for [Salesforce Services](#). It includes a component, CMDB, that runs on Hyperforce as noted below. It also includes the following Einstein features: Case Classification, which run on the Salesforce Services infrastructure and use the following additional sub-processor:

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting Provider for Einstein Case Classification.	Amazon Web Services, Inc.	United States	
		Germany	
		United Kingdom	
		Canada	
		India	
		Australia	
		Japan	
		Brazil	

		Switzerland	
		Singapore	
		Indonesia	
		France	
		South Korea	
		United Arab Emirates	
		Italy	
		Sweden	
		Israel	
Hosting Provider for Configuration Management Database (CMDB) (Hyperforce infrastructure). Customer Data is hosted in the following region.	Amazon Web Services, Inc.	United States	

### Agentforce Speech Foundations

*Agentforce Speech Foundations is an add-on to the Salesforce Services--see infrastructure details for [Salesforce Services](#)—and provider of text to speech and speech to text services that support voice offerings such as Agentforce Voice. Additional sub-processors for this Service are:*

<b>Purpose of Processing</b>	<b>Sub-processors</b>	<b>Locations</b>	<b>Additional Details</b>
Provider of text-to-speech services	Amazon Web Services, Inc. (AWS Polly)	Australia	
		Canada	
		France	
		Germany	
		India	
		Japan	

		Singapore	
		South Korea	
		United Kingdom	
		United States	
	Amazon Web Services, Inc. (Eleven Labs Inc. self-hosted)	France	
		Japan	
		United States	
		United Kingdom	
	Eleven Labs Inc.	Belgium	
		United States	
		India	
	Provider of speech-to-text services	Amazon Web Services, Inc. (AWS Transcribe)	
Brazil			
Canada			
France			
Germany			
India			
Japan			
Singapore			
South Korea			
Sweden			
United Kingdom			
United States			

	Amazon Web Services, Inc. (Deepgram, Inc. self-hosted)	United States	
	Deepgram, Inc.	United States	
		Germany	
Provider of translation services	Amazon Web Services, Inc. (AWS Translate)	Australia	The Real-Time Translations feature within Enhanced Chat and Enhanced Messaging uses Amazon Web Services, Inc. (AWS Translate) to provide translation services.
		Canada	
		France	
		Germany	
		India	
		Japan	
		Singapore	
		South Korea	
		Sweden	
		United Kingdom	
		United States	
Provider of WebRTC and SIP functionality to support Agentforce Voice	LiveKit, Inc.	France	
		Germany	
		United Kingdom	
		Singapore	
		India	
		Israel	
		Saudi Arabia	
		UAE	

		South Africa	
		United States	
		Brazil	
		Australia	
		Japan	

Agentforce Operations (f/k/a Agentforce Supply Chain)

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting Provider for all functionality.	Amazon Web Services, Inc.	United States	
Provider of generative artificial intelligence services.	Google LLC	United States	
User analytics provider.	Pendo.io, Inc.	United States	
Provider of generative artificial intelligence services for the Apromore Services.	Amazon Web Services, Inc.	United States	
		Australia	
		Ireland	

## Automotive Cloud

For Automotive Cloud (including Digital Lending for Automotive) see infrastructure details for [Salesforce Services](#). Some Customers who purchase Automotive Cloud have access to Salesforce Maps Lite; for Customers who use this functionality, see infrastructure details for [Salesforce Maps](#). Some Customers who purchase Automotive Cloud may have access to Channel Revenue Management (ChRM), see infrastructure details for [Salesforce Services](#). Automotive Cloud also includes features that may use the [Einstein Generative AI Services](#), please see the infrastructure details for these features. Additional sub-processors for this Service are:

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting Provider of document generation processing for Server-Side Document Generation feature. Customer Data is hosted in one of the following regions.	Amazon Web Services, Inc.	United States	
		Brazil	
		Canada	
		Australia	
		India	
		Japan	
		Singapore	
		South Korea	
		France	
		Germany	
		Sweden	
United Kingdom			
Service provider of runtime services used by Automotive Cloud APIs powered by MuleSoft. Customer Data is processed in one of the following regions.	Amazon Web Services, Inc.	United States	If a Customer: (a) enables the Automotive Cloud APIs powered by MuleSoft feature as an add-on to Automotive Cloud, and (b) has Customer Data transmitted using runtime services, that Customer Data will be processed on AWS infrastructure.
		Brazil	
		Canada	
		Australia	
		Japan	
		Singapore	

		Germany	
		Ireland	
		United Kingdom	
Provider of generative artificial intelligence services.	Microsoft Corporation (Microsoft Azure)	United States	
		Switzerland	
		France	
		Germany	
		Sweden	
		India	
		Australia	
		Japan	
		Brazil	
		Canada	
		United Kingdom	
Provider of generative artificial intelligence services.	OpenAI, L.L.C.	United States	In the event of a failover, Customer Data is temporarily re-routed to an endpoint hosted on Microsoft Azure and priority will be given to the region in which Customer's org is provisioned, subject to availability.

### Salesforce Backup (formerly Backup and Restore)

Salesforce Backup is an add-on feature for the Salesforce Services—see infrastructure details for [Salesforce Services](#). Additional sub-processors for this Service are:

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting Provider for all functionality. Customer Data is hosted in one of the following regions.	Amazon Web Services, Inc.	United States	
		Brazil	
		Canada	

		Australia	
		India	
		Japan	
		Singapore	
		France Germany Sweden United Kingdom	
		Germany	
		Sweden	
		United Kingdom	
		South Korea	

B2B Commerce (from Version 3.97 or higher, formerly branded as CloudCraze)

Also see infrastructure details for [Salesforce Services](#). Salesforce may route the transmission of Customer Data to Users through any of its data centers, but the storage of Customer Data will be limited to the data centers for the Customers' org. For B2B Commerce on Lightning Experience, see infrastructure details for Salesforce Services.

B2B Commerce on Lightning Experience

B2B Commerce runs on the same infrastructure as the [Salesforce Services](#). See infrastructure details for Salesforce Services.

D2C Commerce (formerly B2B2C Commerce)

Also see infrastructure details for [Salesforce Services](#).

Commerce Messaging is a feature that is available as an add-on to D2C Commerce; for Customers who use Commerce Messaging, see infrastructure details for [Marketing Cloud: Marketing Cloud Engagement Services](#) and [Salesforce Data 360](#), as Commerce Messaging runs on both of these infrastructure.

## Cimulate

For Customers who use Cimulate as an add-on to Commerce Cloud/B2C Commerce, see infrastructure details for [Commerce Cloud/B2C Commerce](#).  
Sub-processor for this Service is:

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting Provider for all functionality.	Google LLC	United States	

## Commerce Cloud/B2C Commerce

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting Provider for B2C Commerce (which may include Managed Runtime), B2C Commerce Order Management, and Commerce Cloud Einstein. Customer Data is hosted in one of the following regions.	Salesforce, Inc.	United States	Any reference to "B2C Commerce Order Management" refers to the version of Order Management released prior to February 19, 2020.
	SFDC Australia Pty. Ltd.	Australia	
	salesforce.com France S.A.S.	France	
	salesforce.com Germany GmbH	Germany	
	Salesforce UK Limited	United Kingdom	
	SFDC Sweden AB SFDC Netherlands B.V.	Sweden The Netherlands	
If Customer is hosted on Hyperforce infrastructure on AWS, then Customer Data will be processed in that infrastructure, as indicated here. If Customer is hosted on Salesforce's own first-party infrastructure, then Customer Data will be processed as indicated above.	salesforce.com Co., Ltd.	Japan	Hyperforce runs on infrastructure provided by Amazon Web Services, Inc. Currently such infrastructure is hosted on AWS in data centers located in the United States.
	Amazon Web Services, Inc.	United States	

Hosting Provider for B2C Commerce which (may include Managed Runtime).	Amazon Web Services, Inc.	United States	
Hosting Provider; CDN for B2C Commerce (which may include Managed Runtime).	CloudFront (Amazon Web Services, Inc.)	Global	The Dynamic Imaging Service feature within Digital uses the Amazon CloudFront content delivery network to store and deliver images, which flow through CloudFront and then the customer's CDN.
Hosting Provider for On-Demand Sandboxes.	Amazon Web Services, Inc.	United States	
Hosting Provider for B2C Commerce and B2C Commerce Order Management. Customer Data is hosted in one of the following regions.	Amazon Web Services, Inc.	United States	
		Germany	
Hosting Provider for Commerce Cloud Einstein. Customer Data is hosted in one of the following regions.	Amazon Web Services, Inc.	United States	
		Ireland	
		Singapore	
CDN for Commerce Cloud Einstein to deliver JavaScript assets to Customer websites	CloudFront (Amazon Web Services, Inc.)	Global	
CDN for B2C Commerce (which may include Managed Runtime), B2C Commerce Order Management, and Commerce Cloud Einstein.	Cloudflare	Global	Cloudflare's services are used for purposes that include a content distribution network, a domain name system network, web content optimization, web application firewall, internet protocol reputation filtering, and distributed denial of service attack prevention.
CDN for B2C Commerce (which may include Managed Runtime), B2C Commerce Order Management, and Commerce Cloud Einstein.	Akamai Technologies, Inc.	Global	Public website content served to website visitors may be stored with Akamai Technologies, Inc., and transmitted by Akamai Technologies, Inc. to website visitors, to expedite transmission.
Hosting Provider for Commerce Marketplace	Amazon Web Services, Inc.	Global	

Consumer Goods Cloud (including Trade Promotion Management, Trade Promotion Optimization, and Retail Execution)

Also see infrastructure details for [Salesforce Services](#). Consumer Goods Cloud is a configuration of functionality from the Salesforce Services. Some Customers who purchase Consumer Goods Cloud have access to Salesforce Maps Lite; for Customers who use this functionality, see infrastructure details for [Salesforce Maps](#). Some Customers who purchase Consumer Goods Cloud may have access to Channel Revenue Management (ChRM), see infrastructure details for [Salesforce Services](#). Consumer Goods Cloud also includes features that may use the [Einstein Generative AI Services](#), please see the infrastructure details for these features. Additional sub-processors for this Service are:

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting Provider for Retail Execution feature, Trade Promotion Management, and Trade Promotion Optimization. Customer Data is hosted in one of the following regions.	Amazon Web Services, Inc.	United States	
		Australia	
		Germany	
Additional Hosting Provider for Trade Promotion Management.	Google LLC	United States	By default AWS is the Hosting Provider for Trade Promotion Management; however, Customers may contact their Account Executive to obtain more information about Trade Promotion Management on Google Cloud Platform as an alternate Hosting Provider, which may be accommodated subject to use case evaluation and availability.
Provider of generative artificial intelligence services.	Microsoft Corporation (Microsoft Azure)	United States	
		Switzerland	
		France	
		Germany	
		Sweden	
		India	
		Australia	
		Japan	
Brazil			

		Canada	
		United Kingdom	
Provider of generative artificial intelligence services.	OpenAI, L.L.C.	United States	In the event of a failover, Customer Data is temporarily re-routed to an endpoint hosted on Microsoft Azure and priority will be given to the region in which Customer’s org is provisioned, subject to availability.

### CRM Analytics (formerly Tableau CRM)

CRM Analytics, which includes Einstein Discovery and Salesforce Data Pipeline, and is often incorporated into certain features of [Salesforce Industries Clouds](#) and the Field Service - Einstein 1 Edition SKU, runs on the same infrastructure as the Salesforce Services-see infrastructure details for [Salesforce Services](#). Certain CRM Analytics SKUs, such as Einstein Predictions, and CRM Analytics Plus and related SKUs, include Einstein Prediction Builder. For these SKUs, also see infrastructure details for Einstein Prediction Builder under [Salesforce Services](#). Certain CRM Analytics SKUs that are branded “Intelligence”, such as Manufacturing Cloud Intelligence, include certain features of Sales Cloud Einstein as well. For these SKUs, also see infrastructure details for [Sales Cloud Einstein](#).

### Customer 360 Data Manager

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting Provider for all functionality. Customer Data is hosted in one of the following regions.	Salesforce, Inc.	United States	
	Kabushiki Kaisha salesforce Japan, also known as Salesforce Japan Co., Ltd.	Japan	
Hosting Provider for all functionality. Customer Data is hosted in one of the following regions.	Amazon Web Services, Inc.	United States	
		Japan	

## Salesforce Data 360 (aka Customer Data Cloud)

Salesforce Data 360 includes features that may use the [Einstein Generative AI Services](#), please see the infrastructure details for these features. (Also applicable to the Services branded as Einstein Personalization, and Customer Data Platform, formerly branded as Salesforce CDP)

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting Provider for all functionality. Customer Data is hosted in one of the following regions.	Amazon Web Services, Inc.	United States	Customers who have their Salesforce Services org provisioned to the Salesforce-Managed AWS Hyperforce environment hosted in India or a Salesforce Services org in the United Arab Emirates may be eligible to have an instance of Salesforce Data 360 provisioned to India. Customers who have their Salesforce Services org provisioned to a Salesforce environment in Indonesia, Japan, Singapore, or South Korea may be eligible to have an instance of Salesforce Data 360 provisioned to Japan. See <a href="#">here</a> and <a href="#">here</a> for further information.
		Germany	
		India	
		Japan	
		Australia	
		Brazil	
		United Kingdom	
		Canada	
		Switzerland	
		Indonesia	
		Singapore	
		France	
		United Arab Emirates	
		Korea	
Italy			
Sweden			
Provider of generative artificial intelligence services.	OpenAI, L.L.C.	United States	
CDN for all functionality.	Akamai Technologies, Inc.	Global	

Database.com

See infrastructure details for [Salesforce Services](#).

Education Cloud

See infrastructure details for [Salesforce Services](#). Education Cloud also includes features that may use the [Einstein Generative AI Services](#), please see the infrastructure details for these features. Some Customers who purchase Education Cloud have access to Salesforce Maps Lite; for Customers who use this functionality, see infrastructure details for [Salesforce Maps](#).

Additional sub-processors for this Service are:

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting Provider of document generation processing for Server-Side Document Generation feature. Customer Data is hosted in one of the following regions.	Amazon Web Services, Inc.	United States	
		Brazil	
		Canada	
		Australia	
		India	
		Japan	
		Singapore	
		South Korea	
		France	
		Germany	
		Sweden	
United Kingdom			
Provider of generative artificial intelligence services.	Microsoft Corporation (Microsoft Azure)	United States	
		Switzerland	

		France	
		Germany	
		Sweden	
		India	
		Australia	
		Japan	
		Brazil	
		Canada	
		United Kingdom	
Provider of generative artificial intelligence services.	OpenAI, L.L.C.	United States	In the event of a failover, Customer Data is temporarily re-routed to an endpoint hosted on Microsoft Azure and priority will be given to the region in which Customer's org is provisioned, subject to availability.

## Einstein Bots

See infrastructure details for [Salesforce Services](#).

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting Provider for all functionality. Customer Data is hosted in one of the following regions, depending on where the Customers' Salesforce Services org is hosted.	Amazon Web Services, Inc.	United States	If a Customer enables NLP functionality for Bots and has Salesforce Services data stored in the EMEA region, then some related Customer Data will be stored in Germany.
		Australia Japan	If a Customer enables NLP functionality for Bots and has Salesforce Services data stored in the APAC region, then some related Customer Data will be stored in Japan, India or the United States.
		Germany Ireland	If a Customer enables NLP functionality for Bots and has Salesforce Services data stored outside of EMEA or

			APAC, then some related Customer Data will be stored in the United States.
		Brazil	<p>Following June 2023, Customer’s Einstein Bots data may be processed in one of these specified locations if Customer’s Salesforce Services org is in or near the location.</p> <p>If a Customer enables NLP functionality for Bots and has Salesforce Services data stored in the EMEA region, then some related Customer Data will be stored in Germany.</p> <p>If a Customer enables NLP functionality for Bots and has Salesforce Services data stored in the APAC region, then some related Customer Data will be stored in Japan, India or the United States.</p> <p>If a Customer enables NLP functionality for Bots and has Salesforce Services data stored outside of EMEA or APAC, then some related Customer Data will be stored in the United States.</p>
		Canada	
		France	
		India	
		Singapore	
		South Korea	
		Sweden	
		United Kingdom	

## Einstein Conversation Insights

See infrastructure details for [Salesforce Services](#).

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting Provider for all functionality. Customer Data is hosted in Europe if the Customer’s Salesforce Services org is in Europe. Otherwise, Customer Data is hosted in the United States.	Amazon Web Services, Inc.	United States	If Customer enables Einstein Conversation Insights, some related Customer Data will be stored in the United States regardless of where Customer’s Sales Cloud data is located.
		France Germany	

Service provider of transcription services.	Amazon Web Services, Inc.	United States	
---	---------------------------	---------------	--

Einstein Conversation Mining

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting Provider for all functionality.	Amazon Web Services, Inc.	United States	
		Germany	
		United Kingdom	
		Canada	
		India	
		Australia	
		Japan	
		Brazil	
		Switzerland	
		Singapore	
		Indonesia	
		France	
		South Korea	
United Arab Emirates			
Italy			

		Sweden	
		Israel	

### Einstein Vision and Language

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting Provider for all functionality.	Amazon Web Services, Inc.	United States	

### Einstein Relationship Insights

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting Provider for all functionality.	Amazon Web Services, Inc.	United States	
Data source used to process search queries for all functionality.	Google LLC	United States	

### Emergency Program Management

*Emergency Program Management is a managed package that runs on top of Salesforce Services—see infrastructure details for [Salesforce Services](#).*

### Employee Productivity

*Included in the “Employee Service - Agent” and “IT-Service Center - IT Agent” SKUs. Employee Productivity is a group of managed packages that run on top of the Salesforce Services—See infrastructure details for [Salesforce Services](#).*

## Employee Service

Employee Service runs partially on the Service Cloud infrastructure - see infrastructure details for [Salesforce Services](#). It also includes the following Einstein features: Article Recommendations, Case Wrap-Up, and Case Classification, which run on the Salesforce Services infrastructure and use the following additional sub-processor:

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting Provider for Einstein Case Classification and Einstein Case Wrap-Up.	Amazon Web Services, Inc.	United States	
		Germany	
		United Kingdom	
		Canada	
		India	
		Australia	
		Japan	
		Brazil	
		Switzerland	
		Singapore	
		Indonesia	
		France	
		South Korea	
		United Arab Emirates	
		Italy	
Sweden			
Israel			

## Enablement (including Enablement Lite)

See infrastructure details for [Salesforce Services](#).

## Enhanced Messaging

Enhanced Messaging works as an add-on to Sales Cloud and Service Cloud, and uses the Sales Cloud and Service Cloud infrastructure—see infrastructure details for [Salesforce Services](#). For the Real-Time Translations feature within Enhanced Messaging —see infrastructure details for [Agentforce Speech Foundations](#). Additional sub-processors for this Service are:

Purpose of Processing	Sub-processors	Locations	Additional Details
Service and hosting provider used for transmission and conversation storage services. Additionally, hosts the Messaging Gateway Server used to process and route inbound and outbound messages.	Amazon Web Services, Inc.	United States	
		Brazil	
		Canada	
		Germany	
		France	
		Sweden	
		United Kingdom	
		Australia	
		Japan	
		South Korea	
		India	
		Singapore	
		Indonesia	
		Italy	
Switzerland			
Israel			

		United Arab Emirates	
Provider of generative artificial intelligence services.	OpenAI, L.L.C.	United States	Applicable if the Agentforce Brand Registration Assistant is enabled.

## Feedback Management

See infrastructure details for [Salesforce Services](#). Some Customers who purchase Feedback Management may have access to CRM Analytics; for Customers who use this functionality, see infrastructure details for [CRM Analytics](#).

## Financial Services Cloud

Financial Services Cloud (including Digital Lending) see infrastructure details for [Salesforce Services](#). Einstein Activity Capture for Financial Services Cloud—see infrastructure details for [Salesforce Services](#). Financial Services Cloud also includes features that may use the Einstein Generative AI Services, please see the infrastructure details for these features. Some Customers who purchase Financial Services Cloud have access to Salesforce Maps Lite; for Customers who use this functionality, see infrastructure details for [Salesforce Maps](#).

Additional sub-processors for this Service are:

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting Provider of document generation processing for Server-Side Document Generation feature. Customer Data is hosted in one of the following regions.	Amazon Web Services, Inc.	United States	
		Brazil	
		Canada	
		Australia	
		India	
		Japan	
		Singapore	
		South Korea	
		France	

		Germany	
		Sweden	
		United Kingdom	
Provider of generative artificial intelligence services.	Microsoft Corporation (Microsoft Azure)	United States	
		Switzerland	
		France	
		Germany	
		Sweden	
		India	
		Australia	
		Japan	
		Brazil	
		Canada	
		United Kingdom	
Provider of generative artificial intelligence services.	OpenAI, L.L.C.	United States	In the event of a failover, Customer Data is temporarily re-routed to an endpoint hosted on Microsoft Azure and priority will be given to the region in which Customer's org is provisioned, subject to availability.

### Flow for Industries (formally Digital Process Automation)

See infrastructure details for [Salesforce Services](#). Additional sub-processors for this Service are:

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting Provider of document generation processing for Server-Side Document	Amazon Web Services, Inc.	United States	
		Brazil	
		Canada	

Generation feature. Customer Data is hosted in one of the following regions.		Australia	
		India	
		Japan	
		Singapore	
		South Korea	
		France	
		Germany	
		Sweden	
		United Kingdom	

#### Government Cloud Plus

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting Provider for all functionality. Customer Data is stored on AWS US-GOV-WEST and AWS-US-GOV-EAST regions.	Amazon Web Services, Inc.	United States (AWS US-GOV-WEST and AWS-US-GOV-EAST )	Salesforce may route the transmission of encrypted Customer Data through various points, including any of its data centers, but the storage and processing of Customer Data will be limited to these regions.

#### Government Cloud Plus - Defense

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting Provider for all functionality. Customer Data is stored on AWS US-GOV-EAST region.	Amazon Web Services, Inc.	United States (AWS-US-GOV-EAST)	Salesforce may route the transmission of encrypted Customer Data through various points, including any of its data centers, but the storage and processing of Customer Data will be limited to this region.

## Health Cloud

Health Cloud is an extension of the Salesforce Services and a managed package that runs on top of the Salesforce Services—see infrastructure details for [Salesforce Services](#). Health Cloud also includes features that may use the [Einstein Generative AI Services](#), please see the infrastructure details for these features. Some Customers who purchase Health Cloud have access to Salesforce Maps Lite; for Customers who use this functionality, see infrastructure details for [Salesforce Maps](#). Additional sub-processors for this Service are:

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting Provider of document generation processing for Server-Side Document Generation feature. Customer Data is hosted in one of the following regions.	Amazon Web Services, Inc.	United States	
		Brazil	
		Canada

CDN for all functionality.	Akamai Technologies, Inc.	Global	
CDN for Marketing Cloud Next features that leverage My Domains (including Enhanced Domains and <a href="#">my.site.com</a> sites). This includes Landing Pages, Forms, Reference Pages and other features that may publish external websites.	Cloudflare	Global	Salesforce leverages CDNs to optimize page load times and site performance. Traffic will flow through the CDN’s network of edge servers, which optimizes routing and caches publicly cacheable content. Customers can opt-out of leveraging Cloudflare CDN for this use case by contacting Support, though opting out may affect performance and certain functionality. <a href="#">Learn More</a>

### Marketing Cloud: Marketing Intelligence

*Unless your Order Form for the Marketing Cloud expressly excludes Marketing Intelligence Reports, Marketing Intelligence Reports is included with and/or accessed through a purchase of the Marketing Cloud Engagement+, Marketing Cloud Intelligence+, Marketing Cloud Next Services. Marketing Intelligence runs on Marketing Cloud on AWS (Hyperforce) and Salesforce Services, and relies on data from Salesforce Data 360 (formerly, Data Cloud). It incorporates components of Data 360, Agentforce, Tableau Next, and Einstein AI. Customer Data will be stored and processed in the Marketing Cloud on AWS infrastructure and Data 360 infrastructure. Accordingly, see infrastructure details for Data 360 and Marketing Cloud Advanced and Growth Editions. Note: Marketing Intelligence and Marketing Intelligence Reports are distinct product offerings than Marketing Cloud: Intelligence Reports for Engagement (formerly, “Datorama Reports”) and Marketing Cloud: Intelligence and Intelligence Data Pipelines (formerly, “Datorama”).*

*Additional sub-processor(s) for this Service are:*

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting Provider for all functionality. Customer Data is hosted in one of the following regions.	Amazon Web Services, Inc. 		United Kingdom	
Provider of generative artificial intelligence services.	OpenAI, L.L.C.	United States	In the event of a failover, Customer Data is temporarily re-routed to an endpoint hosted on Microsoft Azure and priority will be given to the region in which Customer's org is provisioned, subject to availability.

Salesforce CPQ and Salesforce Billing (together formally branded as Salesforce Quote-to-Cash)

See infrastructure details for Salesforce Services. Salesforce CPQ is a managed package that runs on top of the [Salesforce Services](#). Additional sub-processors for this Service are:

Purpose of Processing	Sub-processors	Locations	Additional Details
Quote calculation service provider for all functionality. Customer Data will be processed in one of the following regions.	Heroku, Inc. (on Amazon Web Services)	United States	
		Germany Ireland	
		Australia Japan	
Hosting Provider of document generation processing for Server-Side Document Generation feature. Customer Data is hosted in one of the following regions.	Amazon Web Services, Inc.	United States	
		Brazil	
		Canada	
		Australia	
		India	

		Japan	
		Singapore	
		South Korea	
		France	
		Germany	
		Sweden	
		United Kingdom	
Service provider providing invoice & quote PDF generator	AppExtremes, LLC dba Conga	United States	

Sales Enablement (formerly branded as myTrailhead)

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting Provider for all functionality	Amazon Web Services, Inc.	United States	
	Heroku, Inc. (on Amazon Web Services, Inc.)	United States	
CDN for all functionality	Fastly, Inc.	Global	
Service provider for search functionality. Customer Data will be processed in one of the following regions.	Coveo	United States Canada	
		France Germany Ireland Italy The Netherlands United Kingdom	
	Amazon Web Services, Inc.	United States	

## Salesforce Inbox

See infrastructure details for [Salesforce Services](#). Additional sub-processors for this Service are:

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting Provider for all functionality. Customer Data will be hosted in one of the following regions.	Amazon Web Services, Inc.	United States	Customers, who activated Salesforce Inbox before May 8, 2017, may have Customer Data stored in the United States.
		France	
		Germany	

## Salesforce Maps (including Maps Lite) and Salesforce Sales Planning

See infrastructure details for [Salesforce Services](#). Additional sub-processors for this Service are:

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting Provider for all functionality. Customer Data will be hosted in one of the following regions.	Amazon Web Services, Inc.	United States	
		Germany	
Service Provider used to capture usage data and feedback for all functionality.	Pendo.io, Inc.	United States	

## Salesforce Order Management

See infrastructure details for [Salesforce Services](#). Additional sub-processors for this Service are:

Purpose of Processing	Sub-processors	Locations	Additional Details
Service provider for versions of Order Management released on or after February 19, 2020. Customer Data will be hosted in one of the following regions.	Heroku, Inc. (on Amazon Web Services, Inc.)	United States	
		Germany	
		Australia Japan	

## Salesforce Private Connect

See infrastructure details for [Salesforce Services](#). Additional sub-processors for this Service are:

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting provider used for transmission services for all functionality.	Amazon Web Services, Inc.	United States	
		Australia	
		Brazil	
		Canada	
		France	
		Germany	
		India	
		Indonesia	
		Israel	
		Italy	
		Japan	
		Singapore	
		South Korea	
		Sweden	
		Switzerland	
United Arab Emirates			
United Kingdom			

## Salesforce.org Elevate

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting Provider and non-storage infrastructure support for all functionality. (Also used for Payment Processing and Management for Salesforce.org Elevate)	Amazon Web Services, Inc.	United States	
Hosting Provider for all functionality.	Heroku, Inc. (on Amazon Web Services, Inc.)	United States	
CDN for all functionality.	Fastly, Inc.	Global	
	Cloudinary	Global	
Email service provider for all functionality.	Mailgun Technologies, Inc.	United States	

## Salesforce.org

*Salesforce.org Services are managed packages that run on top of the Salesforce Services; for Accounting Subledger, Admissions Connect, foundationConnect (provisioned on or after August 19, 2019), Grants Management, Nonprofit Cloud Case Management<sup>3</sup>, Salesforce.org Insights Platform: Data Integrity, and Student Success Hub (formerly Salesforce Advisor Link), as well as Services, including Education Cloud, Nonprofit Cloud, and Nonprofit Cloud for Grantmaking that are built directly into the Salesforce platform; see infrastructure details for [Salesforce Services](#). Salesforce.org Services also include features that may use the [Einstein Generative AI Services](#), please see the infrastructure details for these features. Some Customers who purchase Admissions Connect or Grants Management have access to Salesforce Maps Lite; for Customers who use this functionality, see infrastructure details for [Salesforce Maps](#). Additional sub-processors for these Services are:*

Purpose of Processing	Sub-processors	Locations	Additional Details
Service Provider used for transmission services for Student Success Hub (including	Heroku, Inc. (on Amazon Web Services, Inc.)	United States	

<sup>3</sup> References to Nonprofit Cloud Case Management refer to the managed package.

the former Salesforce Advisor Link) and Marketing Cloud Engagement for Nonprofits <b>(formerly Marketing Cloud for Nonprofits).</b>			
Service Provider used for transmission services for Insights Platform. Customer Data will be transmitted in one of the following regions using both AWS and Heroku.	Amazon Web Services, Inc.	United States	
		Germany	
	Heroku, Inc. (on Amazon Web Services, Inc.	United States	
		Germany	
Provider of generative artificial intelligence services.	Microsoft Corporation (Microsoft Azure)	United States	
		Switzerland	
		France	
		Germany	
		Sweden	
		India	
		Australia	
		Japan	
		Brazil	
		Canada	

Provider of generative artificial intelligence services.	OpenAI, L.L.C.	United States	In the event of a failover, Customer Data is temporarily re-routed to an endpoint hosted on Microsoft Azure and priority will be given to the region in which Customer's org is provisioned, subject to availability.
--	----------------	---------------	---

## Salesforce Services<sup>4</sup>

Salesforce Services are Agentforce Contact Center, Chatter, Database.com, Experience Cloud (formerly Community Cloud), Lightning Platform (including Force.com and Salesforce Shield), Sales Cloud, Service Cloud, and Site.com. The same infrastructure and sub-processors are used to host B2B Commerce, B2B Commerce on Lightning Experience, Channel Revenue Management (ChRM), IoT Explorer, Agentforce IT Service<sup>5</sup> (except for the CMDB component), and components of Tableau Next.

Some Customers who purchase the Salesforce Services have access to Social Customer Service, Salesforce Data 360, Einstein Bots, Einstein Conversation Insights, Sales Cloud Einstein, Agentforce Voice, and Sales Engagement. For Customers who use this functionality, see infrastructure details for [Social Studio](#), infrastructure details for [Salesforce Data 360](#), infrastructure details for [Einstein Conversations Insights](#), infrastructure for [Sales Cloud Einstein](#), infrastructure details for [Agentforce Speech Foundations](#), and infrastructure details for [Sales Engagement](#) accordingly.

Some Customers who purchase the Salesforce Services have access to Salesforce Maps Lite. For Customers who use this functionality, see infrastructure details for [Salesforce Maps](#). Additional sub-processors for this Service are:

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting Provider for all functionality. Customer's org is hosted on either AWS or Salesforce infrastructure in one of the following regions, which is chosen by the Customer or an Account Executive when the org is first created. <a href="#">Learn More</a> .	SFDC Sweden AB	Sweden	
	SFDC Netherlands B.V.	The Netherlands	
	SFDC EMEA Data Center Limited	United Kingdom	
	Salesforce, Inc.	United States	
	Kabushiki Kaisha salesforce Japan, also	Japan	

<sup>4</sup> Salesforce offers many packages that include some or all of the features in the Salesforce Services. These packages will link to this section, and may include some or all of the features listed below. See [Where is my Salesforce Instance Located?](#)

<sup>5</sup> For the CMDB component of Agentforce IT Service, see please Agentforce IT Service section.

	known as Salesforce Japan Co., Ltd.		
	Amazon Web Services, Inc.	Australia	Salesforce Advanced Cross-Region Continuity (ACRC) is supported in the European Union, India, Israel, Japan, and the United States. In the EU, Germany is the primary region, and France is the secondary, failover region. For customers in Israel, the secondary, failover region is Sweden.

### Salesforce Spiff

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting provider for all functionality.	Amazon Web Services, Inc.	United States	United States is default hosting location; Data is hosted in Germany upon customer request
		Germany	
Service provider for connectors to other platforms	Workato, Inc.	United States	
Email service provider for all functionality	Mailgun Technologies, Inc.	United States	

## Salesforce Starter (fka Self-Service CRM), including Marketing Email Sends

Salesforce Starter (fka Self-Service CRM) marketing functionality, including Marketing Email Sends, runs partially on the Sales, Service and Experience Cloud infrastructures - see infrastructure details for [Salesforce Services](#), and relies on data from, and writes data to, [Salesforce Data 360](#) infrastructure. Salesforce Starter (fka Self-Service CRM) marketing functionality also incorporates features run on the following infrastructures: [Marketing Cloud: Intelligence and Intelligence Data Pipelines \(formerly Datorama\)](#), [Marketing Cloud: Intelligence Reports for Engagement \(formerly Datorama Reports\)](#), [Marketing Cloud: Marketing Cloud Engagement Services](#), [Marketing Cloud: Marketing Cloud Einstein](#), [Marketing Cloud Account Engagement](#), [Marketing Cloud Next](#), [Privacy Center](#), [Salesforce Inbox](#), and [Sales Engagement \(formerly High Velocity Sales\)](#). Please see infrastructure details for each of these features.

## Salesforce Web3 Services (including Web3 Connect and NFT Management)

Salesforce Web3 is a managed package—see infrastructure details for [Salesforce Services](#).

## Service Cloud Einstein

Service Cloud Einstein is an add-on Service to Service Cloud, and runs partially on the Service Cloud infrastructure—see infrastructure details for [Salesforce Services](#). Additional sub-processors for this Service are:

Purpose of Processing	Sub-processors	Locations	Additional Details
Hosting Provider for Einstein Reply Recommendations. Customer Data is hosted in one of the following regions depending on the location of the Customers Salesforce Services org.	Amazon Web Services, Inc.	United States	
		Germany Ireland	
		United Kingdom	
		Canada	
		Japan Australia	

			Amazon Web Services infrastructure in the United States or India in addition to their region.
Hosting Provider for Einstein Case Classification and Einstein Case Wrap-Up.	Amazon Web Services, Inc.	United States	
		Germany	
		United Kingdom	
		Canada	
		India	
		Australia	
		Japan	
		Brazil	
		Switzerland	
		Singapore	
		Indonesia	
		France	
		South Korea	
		United Arab Emirates	
		Italy	
Sweden			
Israel			

## Service Cloud Voice

Service Cloud Voice is an add-on to Service Cloud, and runs partially on Service Cloud infrastructure—see infrastructure details for [Salesforce Services](#).

Purpose of Processing	Sub-processors	Locations	Additional Details
Service and hosting provider used for transmission and call transcript storage services.	Amazon Web Services, Inc.	United States	
		Brazil	
		Canada	
		Germany	
		France	
		Sweden	
		United Kingdom	
		Australia	
		Japan	
		South Korea	
		India	
		Singapore	

## Einstein Generative AI Services

Einstein Generative AI Services include Covered Services branded as “Agentforce”<sup>7</sup>, including Agentforce Voice, Einstein for Platform, Einstein for Sales, Einstein for Service, Einstein for Field Service, Einstein GPT for Commerce, Einstein GPT for Sales, Einstein GPT for Service, Pre-Work Brief (available through the Field Service - Einstein 1 Edition SKU), the Customer Experience Intelligence feature of Service Cloud,<sup>8</sup> ApexGuru, and Einstein Generative AI Services for [Salesforce Industries Clouds](#). These Services include features that run on multiple infrastructure, and Customer access to Einstein Generative AI Services is through another Service, as described further in the [Einstein Platform SPARC](#). See infrastructure details for [Salesforce Services](#) and the applicable Einstein features. See infrastructure details for [Agentforce Speech Foundations](#) for applicable Agentforce Voice features.

Purpose of Processing	Sub-processors	Locations	Additional Details
Provider of generative artificial intelligence services.	OpenAI, L.L.C.	United States	In the event of a failover, Customer Data is temporarily re-routed to an endpoint hosted on Microsoft Azure and priority will be given to the region in which Customer’s org is provisioned, subject to availability.
Provider of generative artificial intelligence services.	Microsoft Corporation (Microsoft Azure)	United States	Batch Processing via Azure OpenAI utilizes global endpoints, geo-aware routing rules are not supported. For more details see <a href="#">Geo-Aware Routing for OpenAI and Azure OpenAI</a>
		Switzerland	
		France

## Tableau Next (Formerly Tableau Einstein)

Tableau Next is dependent on Salesforce Data 360 (see infrastructure details for [Salesforce Data 360](#)) and also runs in part on the same infrastructure as the Salesforce Services (see infrastructure details for [Salesforce Services](#)).

## Unified Messaging

Unified Messaging runs partially on [Data Cloud](#) and [Marketing Cloud: Marketing Cloud Engagement Services](#) infrastructures and incorporates features that run on the following infrastructures: Service, Sales, and Experience Cloud – see infrastructure details for [Salesforce Services](#), [Marketing Cloud: Marketing Cloud Engagement Services](#), and [Enhanced Messaging](#). Please see infrastructure details for each of these features.

## Vlocity Services

Vlocity Communications package, Vlocity Media and Entertainment package, Vlocity Energy & Utilities package, Vlocity Insurance package, Vlocity Health package, and Vlocity Government package are managed packages that run on top of the Salesforce Services. Communications Cloud, Media Cloud, and Energy & Utilities Cloud Services are an extension of the Salesforce Services and where indicated may include the applicable Vlocity package listed above. See infrastructure details for [Salesforce Services](#). Communications Cloud and Media Cloud also includes features that may use the [Einstein Generative AI Services](#), please see the infrastructure details for these features. Some Customers who purchase Communications Cloud, Energy & Utilities Cloud, or Media Cloud have access to Salesforce Maps Lite; for Customers who use this functionality, see infrastructure details for [Salesforce Maps](#). Some Customers who purchase Media Cloud or Communication Cloud may have access to Revenue Cloud Advanced features. For Customers who use these functionalities, see infrastructure details for [Revenue Cloud Advanced](#). Additional sub-processors for this Service are:

Purpose of Processing	Sub-processors	Locations	Additional Details
